

DISPERS SR CONZ

Condensation product of aromatic sulphonic acids

PROPERTIES

Appearance	: Fine beige/Brown powder
Active Substance	: $90 \pm 1\%$
pH	: $6,5 \pm 0,5$ 10% Sol. Anionic
Shelf Life	: 24 months in original container

CHARACTERISTICS

- *Very good water solubility.
- *Strong dye and retanning penetrating power.
- *Soft and uniform Neutralising effect.
- *Very good distribution and penetration of Vegetable extracts.

APPLICATIONS

The use of Dispers SR CONZ during the dyeing process allows their quick penetration and more uniform final colour. Dispers SR CONZ can be used as neutralising agent especially with Neutra p-16 or another alcaly salts it gives uniform and even neutralisation therefore improves the distribution of retanning materials, dyes and fatliquors. Use of Dispers SR CONZ stops the excessive fixation on the grain vegetable and another retanning chemicals. The quantity generally used depends the type of article to be produced but we suggest 2% will be satisfactory.
