

# HUMATIN

Pure polysaccarin and polyglycols mixture

## PROPERTIES

Appearance	:Light yellow clear liquid
Active Substance	:98 ± 2
Ph	:8 ± 0,5 10% Sol.
Shelf Life	:18 months in original container

## CHARACTERISTICS

- \*Complytly water soluble.
- \*Electrolist and hard water stable.
- \*It keeps the humidity constants.
- \*Very good light fastness.

## APPLICATIONS

HUMATIN is a special polysacarids.It gives stable humidity to the finished leather.The leather to be finished must be some constent humidity in order to get btter finishing effect.It helps the elasticity of the leather.In the modern tanning process drying takes very quick.Quick dried leather loose the humudity very soon.HUMATIN keeps the humidity constant and resultant leathers are much more softer,elasticity is higher andfoolness is complite.HUMATIN is used with the fatliqour together 0,5-1% depending the thickness of the produced leather.
