

NEUTRA KDN

Based on polycyclic aromatic hydrocarbon derivatis & buffering salts

PROPERTIES

Appearance	: Ivory beige powder
Ph (10 % sol)	: 6-6,5
Active Substance	:98 ± 2
Shelf Life	:24 months placed in dry room well closed original bags.

CHARACTERISTICS

- * Very even & uniform neutralisation action good masking action
- *Upgrading uniformity of dyes
- *Even distribution of retanning chemicals
- *Very safe & deep even neutralisation action
- *Suitable to use at the end of rechroming to basify the chrome
- *Good chrome exhaustion
- *Easily soluble in water

APPLICATIONS

NEUTRA KDN without any risk may be used as a neutralisation agent alone with any kind of leather such –sheep - goat- calf buffallo etc.

When applied in the end of rechroming resulting good masking action & giving even chrome distribution , achieving good chrome exhaustion.

In case of excessive lime coming from deliming process, it is advisable to combine NEUTRA KDN with 0,5 % - 1% Neutra P-16 or Re-sntan Fks NEUTRA KDN gives a very deep & even neutralisation without risk of looseness.
