

ACRYL R-150

Water soluble polymer

FEATURES

Property	Value
Appearance	Dark orange liquid
Active Substance	38,5+-0,5
pH	7+-0,5 %10 Sol.
Shelf Life	18 monts in original container

CHARACTERISTICS

- *Good solbility in warm water.
- *Very strong and effective retanning action.
- *Good light fastness.
- *Suitable for white leather.
- *Gives exellent fulness.
- *Especially developed very loose fibre structured leathers without non-elastic grain.
- *It improves the tensile strength and grain resistance.
- *It doesn't improve softness.

APPLICATION

ACRYLR-150 is frequently used in neutralisation process in the same bath. In this case the result is more convinient. In order to receive very good fullness-grain resistance and tensile strength the quantity to be used 2-5% is enough on the shaved weight. ACRYL R-150 must be used over the Ph 5 because this polymer is sensitive to Ph lower than 5.
