CHARACTERISTICS

- *Completely soluble in water.
- *Stable in hard water.
- *Stable in alkalies.
- *No foaming power.
- *Good despersing natral grease.
- *Very good wetting even dry leather.

APPLICATION

CS 1000 is a special soaking and natural fat dispersng agent used in main soaking process.It helps to bring the soaking Ph to 9-9,5 without effecting fibre structure of the leather.Removes the dirt of the surface leather.Very good dispersing effect of the undesired fatty matters.Good even and uniform rehydration of fibres when it is used with the combination of non-ionic wetting asistance.Generally depending of the leather type and kind we suggest to use 0,3-0,5% on the salted rawhide weight.As it bring the Ph up to 9-9,5 help liming process to be done more clear an without risk of wrinkles.
