

# DISPERS SR CONZ

Condensation product of aromatic sulphonic acide.

## FEATURES

Property	Value
Appearance	Fine bej/Brown powder
Active Substance	90 ± 1%
pH	6,5 ± 0,5 10%Sol.Anionic
Shelf Life	24 months in original container

## CHARACTERISTICS

- \*Very good water solubility.
- \*Strong dye and retannig penetrating power.
- \*Soft and uniform Neutralising effect.
- \*Very good distribution and penetration of Vegetable extracts.

## APPLICATION

The use of Dispers SR CONZ during the dyeing process allows their quick penetration and more uniform final colour. Dispers SR CONZ can be used as neutralising agent especially with Neutra p-16 or another alcaly salts it gives uniform and even neutralisation therefore improves the distribution of retanning materials, dyes and fatliqours. Use of Dispers SR CONZ stops the excessive fixation on the grain vegetable and another retanning chemicals. The quantity generrally used depends the type of article to be produced but we suggest 2% will be satisfactory.
