

# HUMATIN

Pure polysaccharin and polyglycols mixture

## FEATURES

Property	Value
Appearance	Light yellow clear liquid
Active Substance	98 ± 2
pH	8 ± 0,5 10% Sol
Shelf Life	18 months in original container

## CHARACTERISTICS

- \*Complytly water soluble.
- \*Electrolyte and hard water stable.
- \*It keeps the humidity constants.
- \*Very good light fastness.

## APPLICATION

HUMATIN is a special polysaccharide. It gives stable humidity to the finished leather. The leather to be finished must be some constant humidity in order to get better finishing effect. It helps the elasticity of the leather. In the modern tanning process drying takes very quick. Quick dried leather loses the humidity very soon. HUMATIN keeps the humidity constant and resultant leathers are much softer, elasticity is higher and softness is complete. HUMATIN is used with the fat liquor together 0,5-1% depending the thickness of the produced leather.
