

LET SOFT LIQ

Protease soaking enzyme

FEATURES

Property	Value
Appearance	Clear liquid
pH	6+-0,5
Shelf Life	12 months original container

CHARACTERISTICS

- * Evenly distributes glucosamin & glycans.
- * Gives even soaking effect, disperses natural fats without taking out of skin, in order to keep tearing resistance of leather.
- * Gives even pH distribution.
- * Does not cause any loosening effect.
- * Let-soft liquid is a protease soaking enzyme, does not contain any lipase.

APPLICATION

LET-SOFT LIQUID is a new generation, biodegradable protease enzyme. It is used together with non-ionic soaking agents and small amounts of non-ionic surfactants such as Savanol F-80. Suggested quantities depending on leather type and conditions:

- Sheep skin (in paddle): 0.1 – 0.2%
- Goat skin: 0.2 – 0.3%
- Wet salted bovine hide: 0.1 – 0.15%
- Salted bovine hide: 0.2 – 0.3%
