

# NEUTRA KDN

Based on polycyclic aromatic hydrocarbon derivatis & buffering salts

## FEATURES

Property	Value
Appearance	Ivory beige powder
Active Substance	98 ± 2
pH	6-6,5
Shelf Life	24 months placed in dry room well closed original bags.

## CHARACTERISTICS

- \* Very even & uniform neutralisation action good masking action
- \*Upgrading uniformity of dyes
- \*Even distribution of retanning chemicals
- \*Very safe & deep even neutralisation action
- \*Suitable to use at the end of rechroming to basify the chrome
- \*Good chrome exhaustion
- \*Easily soluble in water

## APPLICATION

NEUTRAKDN without any risk may be used as a neutralisation agent alone with any kind of leather such -sheep-goat- calf buffalo etc. When applied in the end of rechroming resulting in good masking action & giving even chrome distribution, achieving good chrome exhaustion. In case of excessive lime coming from deliming process, it is advisable to combine NEUTRAKDN with 0,5 %-1% Neutra P16 or Re-sntan Fks NEUTRA KDN gives a very deep & even neutralisation without risk of flooseness.
