APPLICATION

Neutra P-16 is very helpful chemical to be used during soaking and liming process. No matter raw materials as dried or fresh salted. The quantity depends of water hardness 0,2-0,3 % will help process to solve the problems. Neutra P-16 is a special neutralising agent suitable for any chrome or vegetable tanned leather where there is a lime left and a soft

action is required. Neutra P-16 is very effective if used in the depikling process where uniform and deep neutralization is required. It helps dye penetration in

any circumstances. In this case it shows a strong degreasing action so the skins no need to treat with salt solution. Quantities varying from 1-2% are usually sufficient.
