APPLICATION

NL 2000 is a mixture of buffer salts and enzyme which is used every kind of goat-sheep-cow etc. leather production in the liming process. After good soaking process with LET SOFT and bringing th Ph of the pelt to 9-9,5 in an new bath we suggest

Water 26c	100%	3-3,5 Be
NL 2000	0,3-0,5%	
DAT 2002 NEW	0,8-1%	RUN 20 Min.

Then fallow normal process.

NL 2000 helps to eliminate the parelel wrinkles generally occurs in the belly parts. It also helps to minimize the shoulder wrinkles. NL 2000 produce very clean pelts without interfering the natural structure of the leather.
