

NL 2000 LIQ

Liquid protease keratinize

FEATURES

Property	Value
Appearance	Clear Liq
Ph	6+-0,5
Shelf Life	12 months original container

CHARACTERISTICS

*NL-2000 liq is a keratinize enzyme used in the unhairing bath to clean and eliminate especially hair roots.

*Eliminates blood stains and remained fatty matters, so giving even, flat, clean pelt.

*It is suitable hard water.

*NL-2000 liq used leather surface is much more clean, without wrinkles and more opened-up area.

APPLICATION

Bovine, sheep, goat-buffalo etc. it is safely used product.

If the leathers are good soaked with Let-soft liq, reaching pH: 9 - 9,5, in the unhairing & liming process we suggest first to start DAT-2002 new antiwrinkle agent then to give NL-2000 liq with Sodium Hydrosulphide & Sodium sulphide together gives better results.

Resulted article more opened up, flat not excessive & uneven plumped.

Grain clean without any blood & fat or stains, belly loose are more fuller & without wrinkles.
