

RE-SNTAN DL-W

Pure 4.4 Diphenyl sulphone

FEATURES

Property	Value
Appearance	Off white powder
Active Substance	98+-2
pH-value (100 g/l) at 20°C:	3,5+-0,5 sol.%10
Shelf Life	1 year in its original container

CHARACTERISTICS

- *Gives full leather with fine grain.
- *Very brilliant and clear color.
- *It is the main product for white and pastel color leathers .
- *Has a very strong self tanning power hence, it is highly recommended in the production of chrome free or wet-white tanning.
- *It enhances excellent light fastness giving more uniform dyeing of pastel colors.
- *Can be used in all stages of leather processing. Combination with vegetable tanning results good penetration and very clear color, with elastic grain.
- *Very powerfull dispersing effect.
- *It increases the buffing property of the leather.

As such % based on shaved weight:

For upper leathers: 3.0 - 8.0%

For garment: 2.0 – 4.0 %

For light leathers : 2.0- 6.0%

For sheep skins: 3.0-7.0%

For chrome free leather: 8.0-12 %
