

RE-SNTAN ORJ

Balanced blend of amino resins, vegetable extracts and dispersing syntans

FEATURES

Property	Value
Appearance	Brownish beige powder
Active Substance	98+-2
pH	4.5 - 5.5
Shelf Life	36 months in original container

CHARACTERISTICS

- *Easily dispersible in water.
- *Especially formulated for chrome retanning.
- *Without dye retanned leather shows light vegetable look.
- *It does not compromise the colour shades.
- *Gives better evenness of the colours.
- *Gives very compact and fine fibrous structure without grain looseness.
- *Very good grain patterns for embossed articles.

APPLICATION

We generally suggest in the retanning process 8-10% on the shaved weight. The combination of acrylics and auxiliary syntans allow to obtain very fine and full grain. Where soft embossed leather to be produced at the end of fatliquoring 2-4% RE SNTAN ORJ will help good printing effect. It is very suitable belting retanning 16-18% of RE SNTAN ORJ instead of vegetal extract gives supple and elastic belting leather.
