

# SAVANOL F-80

High concentrated Non-ionic and anionic surface active mixture.

## FEATURES

Property	Value
Appearance	Colorless liquid
Active Substance	80± 2
pH/Charge	5.0-5.5
Light fastness	Has not effect
Solubility	Completely soluble every ratio

## CHARACTERISTICS

Savanol F-80 hence different chains containing performs high soaking, dispersing and high degreasing effect. Keeps the dirt in suspension and eliminates re back so gives very clean surface of the pelt. Because of its functional constitution it is suitable to use starting soaking from raw hide can be safely used all the process. Savanol F-80 can be used without dilution. But much advisable to use 1:4 water, in order to increase the dispersing effect.

## APPLICATION

On salted hides pre soaking 0,02-0,5 %

In the main soaking 0,05 -0,1%

Liming process 0,02 -0,05%

Deliming and bating 0,02 -0,05 is suggested

For sheep skin leathers mainly for decreasing is very effected. 3-4% is sufficient especially English and Norwegian fatty sheeps.
